

rSpacer CEP
Product No. BA 0248

Product Information

C₄₁H₅₉N₂O₇PSi
Mol. Wt.: 750.98

Use: Dissolve the phosphoramidite in acetonitrile at concentrations recommended by the synthesizer manufacturer. Coupling should be carried out using standard instrument RNA protocols using a 12 minute coupling time. Cleavage from the solid support can be carried out under standard conditions, and the rSpacer residue is stable to standard deprotection conditions.
