

1,N²-Etheno-dG CEP

Product No. BA 0403

Product Information

C₆₃H₆₆N₇O₉P
Mol. Wt.: 1096.23

Use: Dissolve the phosphoramidite in acetonitrile at concentrations recommended by the synthesizer manufacturer. Coupling should be carried out using standard instrument protocols. Extended coupling times may improve yields slightly. Cleavage from the solid support can be carried out under standard conditions, and standard deprotection conditions may be employed.
